Mutual Fund Training Module

What are Mutual Funds?

A mutual fund is a company that pools money from many investors and invests the money in securities such as stocks, bonds, and short-term debt. The combined holdings of the mutual fund are known as its portfolio. Investors buy shares in mutual funds. Each share represents an investor's part ownership in the fund and the income it generates.

Structure of Mutual Funds

The structure of MF's in India comprises the following components:

1) Mutual Fund sponsors:-

Sponsors float a Mutual fund. The constitution of an MF in India is a trust. The Sponsors Create a trust and get approval of the SEBI. SEBI Appoints trustees.

2) Mutual Fund Trust:-

The Trustee appoints an Asset Management Company(AMC) to Manage the investments and operate the fund according to prudential guidelines issued by SEBI and other regulators. They also appoints custodians who hold the fund's securities in the safe keeping, settle securities transactions, collect interest/dividends on such securities and keep a record of information on corporate actions.

3) Assets Management Company:-

AMC is also referred to as Fund House, **AMC Manages** the investors funds. The AMC office typically will have the chief executive officer, chief operating officers, Company Secretary, Fund manager, banking managers, scheme accountants/manager, legal cum compliance officer and personnel managers.

AMC takes care of all the operations functions and is responsible for compliance under various statutes. AMC appoints the distributors/agents, registrar and transfer agents and bankers.

a) Distributors/Agents:- Sell units on behalf of the fund to the investing **public/investor**. They also provide advisory services.

b) Registrar and Transfer Agents:- Maintains records of the investors' investments or transactions. All transactions of purchase, switch, redemptions of units of the various

schemes by investors and brokerage [payment payments](#) are processed by the registrar and the transfer agents.

Benefits of Investing in Mutual Funds:-

There are various benefits of investing in Mutual Funds:-

1)Access to professional money manager:

Experienced fund managers manage money by using fundamental and technical analysis and also advanced quantitative and mathematical techniques.

2)Diversifications:-

Investors can reduce the volatility of returns through diversification by investing in a number of organizations across a broad spectrum of industries and sectors.

Diversification prevents investors from putting all their eggs in one basket.

3)Liquidity:-

Open-ended Mutual Funds are priced daily and MFs are always willing to buy back units from investors. This means that investors can sell their MF holdings anytime without worrying about finding a buyer at the right prices.

4)Tax efficiency:-

The Following investments are tax efficient:

a)ELSS:-Equity Link investment schemes, they primarily invest in stock. In these schemes dividends are tax free. There is no tax payable by the MF on dividend distributed. There is no TDS on dividends as well. Investment for over 12 months qualifies for long term capital gains.

b)Debt Funds: MFs with variable percentage of debt instruments are known as debt funds or debt-oriented MFs.

5) Low transaction costs:-MFs are a pool of money for many investors and the amount of investment made in securities is large. Therefore, Mutual Funds pay low transaction cost because of the economies of scale and this in turn is beneficial for investors.

6)Transparency:- Prices of open ended MF are declared daily. Regular updates on the value of investment are available. The portfolio is also disclosed regularly with the fund manager investment strategy and outlook.

7)Well-regulated industry:- MFs are registered with SEBI, which ensure that MF functions under the strict regulations designed to protect the interests of investors.

Terms Used in Mutual Fund Transactions:-

NAV or Net Asset Value:- NAV per unit is simply the net value of assets divided by the number of outstanding units. Buying and Selling of units in funds is based on NAV-related prices. NAV is calculated as:

$$\text{NAV} = (\text{Market value of the fund's investment} + \text{Receivables} + \text{Accrued Income} - \text{Liabilities} - \text{Accrued expenses}) / \text{Number of Outstanding units.}$$

KIM or Key Information Memorandum:- Key Information Memorandum KIM is an abridged version of the offer documents.

Offer Documents:- The offer document is similar to the prospectus of an organisation. The document contains information related to the investment objectives, details about the fund manager, top executives, investment patterns proposed, fee recovery by way of load (entry/exit), type of funds (open ended/close ended) and any regulatory issues faced by the funds.

Systematic Investment Plan:- The systematic investment plan (SIP) is similar to the recurring deposit. In an SIP, the investor is allowed to invest a similar amount monthly/quarterly for period ranging from 3 months to 6 months in a particular scheme. The advantage of investing through SIP Mode is to average the fluctuation in the NAV prices during the investment tenure. MFs typically call this "Rupee Cost Averaging" or "Dollar Cost Averaging". There is also an option with as low as Rs. 100 monthly investment in the case of Micro SIP.

Systematic Withdrawal Plan:- In a systematic withdrawal plan (SWP), an investor can choose to withdraw the investment made periodically.

Systematic Transfer Plan:- In a systematic transfer plan, an investor can choose to transfer the investment to a different scheme of the same AMC periodically.

Exit Load:- Exit loads are minor penalties imposed by the AMCs to discourage premature redemption of mutual funds.

An exit load is calculated on the Net Asset Value (NAV) for each investment or SIP as per the exit load mentioned in the factsheet for the month when the fund has been purchased.

Expense Ratio:-

Mutual Funds charge a fee for managing your money. This fee is referred to as the expense ratio and is expressed in terms of a percentage of the AUM (Assets Under Management). The expense ratio for a scheme is disclosed on the respective AMC's website every month as part of the factsheet. A direct plan and a regular plan under the same scheme will have different expense ratios (lower for direct plans).

CAGR:-

The compound annual growth rate (CAGR) is a useful measure of growth over multiple time periods. It can be thought of as the growth rate that gets you from the initial investment value to the ending investment value if you assume that the investment has been compounding over the time period.

XIRR:-

When measuring returns on investments over multiple years with multiple investments, the Absolute return doesn't give an accurate picture.

The absolute return shows the growth of your investment without considering the investment time period. It is simply the percentage difference in the money you had before investing and the money you have now.

When you have made multiple investments (at different points in time), in the same financial instrument, SIPs for example,

XIRR (extended internal rate of return) is the measure of return that has to be used for accurate depiction of the growth of your investment.

XIRR is relevant only if there are multiple investments at different points in time, and the duration of investment is more than 1 year.

XIRR is an aggregation of multiple CAGRs.

Types of Mutual Funds

There 2 types of mutual funds in India:-

- 1) **Direct Mutual Fund**:-An investor has to invest directly with the AMC, with no distributor to facilitate the transaction.
- 2) **Regular Mutual Fund**:- the investor invests through an intermediary such as distributor, broker or banker who is paid a distribution fee by the AMC, which is charged to the plan.

Direct Mutual Funds		Regular Mutual Funds	
• Lower expense ratios		• Higher expense ratios	
• Higher returns		• Lower returns	
• You need to do your own market research		• Offered by Brokers	
• Direct Mutual Funds are the self-service kind		• Broker or intermediary assists you	

Categories of Mutual funds:-

MFs may be classified based on their structure and investment options. the following figure describes this classification.

Structure Based MFs

The Type of MFs Based on structure are:-

Open ended funds:- Are available for subscription all through the year. these funds do not have fixed maturity. Investors can conveniently buy and sell units at NAV related prices. The price depends upon the NAV of the schemes.

Close- ended funds:- Have a stipulated maturity periods, which generally range from 3 to 15 years. these funds are open for subscription only during a specified period. investors can invest in a scheme when a new fund is offered and thereafter, they can buy or sell the units of the scheme on the stock exchanges, if the scheme is listed. the market price at the stock exchange can vary from scheme's NAV on account of the demand and supply situation, unit holder's expectations, and other market factors.

Interval Funds:- These funds combine the features of both open and closed ended funds. wherein the funds are close ended for the first couple of years and open ended thereafter. Some funds allow fresh subscription and redemption at fixed time every year (say every six months) in order to reduce the administrative aspects of daily entry or exit, yet providing reasonable liquidity.

Investment objective of MFs

The types of MFs based on investment objective are:

a) Growth Funds:- Provide capital appreciation over medium and long term. Such funds normally invest a majority of their corpus in equities. Growth funds are ideal for investors who have a long term outlook and are seeking growth over a period of time.

b) Income funds:- Provide regular and steady income to investors. Such funds generally invest in fixed income securities, such as bonds, corporate debentures and government securities.

Income funds are ideal for capital stability and regular income. Capital appreciation in such funds may be limited, though risks are typically lower than in growth funds.

c) Balanced funds:- Provide both growth and regular income. Such funds periodically distribute a part of their earnings and invest both in equities and fixed income securities in the proportion indicated in their offer documents. This proportion affects the risk and the returns associated with these funds. If equities are allocated a higher proportion, investors are exposed to risks similar to that of the equity market. Balance funds with an equal allocation to equities and fixed income securities are ideal for investors looking for a combination of income and moderate growth.

d) Money Market Funds:-

Provide easy liquidity, preservation of capital & moderate income. These funds generally invest in safe short term instruments, such as treasury bills (T-Bill), certificate of deposits (CDs), commercial paper and inter bank call money. Returns on these funds may fluctuate depending upon the interest rate prevailing in the market. These funds are ideal for the corporate and individual investor as a means to park their surplus funds for short periods of time.

e) Equity related schemes:- There are various equity related schemes. These are

- **Tax Saving schemes:-** Offer tax rebates to the investors under specific provisions of the Indian income tax law. The government of India offers tax

incentives for investment in specified avenues. Investment made in equity linked saving schemes and pension schemes are allowed as deduction under section 80 c of the Indian Income Tax Act, 1961.

- **Index Schemes:-** Attempt to replicate the performance of a particular index, such as BSE and NSE.
- **Sectoral Schemes:-** Invest exclusively in specified sectors, such as fast moving consumer goods (FMCG), IT and Pharmaceuticals. These schemes carry highest risk as compared to general equity schemes because the portfolio is less diversified because it is restricted to specific sectors/industries.

Types of Plans offered by Mutual Funds:-

To cater to the different investment needs of investors, MFs offer various investment options. Some of the important investment options include:

- a) **Growth Option:-** Dividend is not paid out under a growth option and investment realizes only the capital appreciation on the investment as a result of an increase in NAV.
- b) **Dividend Payout option:-** Dividends are paid out to investors under this option. However, NAV of the MFs falls to the extent of the dividend payout.
- c) **Dividend reinvestment option:-** The dividend accrued on MFs is automatically reinvested in purchasing additional units in the open-ended funds. In most cases, MFs offer the investor an option of collecting dividends or reinvesting the same.
- d) **Systematic Investment Option:-** The investor is given the option of preparing a predetermined number of PDCs in favor of a systematic investment plan fund. The investor is allotted units on a predetermined date specified in the offer document at the applicable NAV.

Investment in Mutual Fund via Paytm Money:

Paytm Money is a platform which facilitates investment in MF. Paytm Money is not an AMC. Its service provider which facilitates investment in direct Mutual funds. To invest in MF via Paytm Money app, one needs to have a demat account with Paytm Money. Onboarding process in Paytm Money is completely online.

Important points to be noted while opening an account with Paytm Money:-

1.We allow only one PAN mapped with one mobile no. Customers cannot have multiple accounts.

2.Address proof document includes Aadhaar Card, Driving licence or Passport.

3.Customer has to update all the personal details (i.e., Name, Age, Gender, Marital Status, Employment Category and Nominee).

4.Signature uploaded should be with BLUE/BLACK ink with white background.

5.Live photo(Selfie) has to be uploaded in the photo section.

6.IPV(In- Person verification)- Customer has to make a short video of himself/herself speaking the OTP, which he/she will receive while completing the KYC.

7.All the details should match with the PAN card (Name, Age, Photo, Signature).

8.Paytm Money supports only Indian Residents. NRIs are not allowed to invest through Paytm Money.

Modes of Investment in Paytm money App:-

There are 2 major modes via which you can invest in Mutual fund in paytm money app:-

1)**One time investment or Lumpsum investment:-** A lump sum amount is defined as a single complete sum of money. A lump sum investment is of the entire amount at one go.

For example, if an investor is willing to invest the entire amount available with him in a mutual fund, it will be referred to as lump sum mutual fund investment.

2) **SIP or Systematic investment plan**

A Systematic Investment Plan (SIP) is a mode of investment for mutual funds in which investors make regular, automated contributions periodically. With SIPs, you can plan your investments to achieve your financial goals over the long term. You can do this by determining the target amount and the amount you'd like to invest at periodic intervals in a mutual fund scheme you've chosen.

A monthly SIP can be set in the app. The 1st installment amount will be deducted on the transaction date and the next installment is reflected on the same page of the app.

Payment Mode available in App:-

There are 2 payment mode is available:-

1) Netbanking:-

In case of net banking you just need to select the netbanking option>>click on pay it will redirect you to the netbanking page of your linked bank account.

2)UPI:-

In case of UPI Option you have to select your UPI app or just need to enter the UPI ID>>click on pay option it takes to UPI app payment page>>enter your UPI pin and confirm the payment of transactions.

What is Autopay option in paytm app:-

Auto-pay is an automated process, which pays your balance in full each billing cycle 1 days prior to the due date, scheduled payments are manually entered by you for the date you choose each time you make a payment

Step 1:- Go to For you Option in Mutual fund section:-

Step2:- Click on setup auto pay option.

Step 3:- Again, click on the Autopay option on the next page.

Automate SIP Payments

Redemption of Mutual Funds:-

Mutual fund redemption is how the investors sell their fund units. However, if there is an exit load, then the investors necessarily pay it on redeeming their units. When investors redeem their units, they earn taxable capital gains. The taxability of capital gains depends on the type of fund and the period of holding. Here, investors should mandatorily consider all the expenses that they would incur on redeeming their units.

-A mutual fund redemption is the process of withdrawing units in order to obtain your returns from the fund.

-Redeemable Units are the units that are available to withdraw/redeem/sell.

-Customer can find his redeemable units in the Portfolio tab for the particular Mutual fund that he wish to be redeemed.

-Redeemable units are reflected after 24 hrs from the time of unit allotment.

-For ELSS funds units are under a locked period for a minimum of 3 years.

To place a withdrawal request in Paytm money. Please follow the instructions:-

Step 1:- Click the portfolio option.

Step 2:- Select the MF which you want to redeem/sell and click on SELL option.

Changes in Default Bank:-

The client can set his secondary bank account as default bank. There are 2 types of changes of default bank account:-

Case 1) If a customer is having investment:-

In this case Customer has to first contact the RTA(CAMS/Franklin/KFintech) for change of default bank account. Once, Update is done at the end of RTA then client has to contact our customer support team with confirmation received from RTA. Then, Our team will update from backend.

Case2) If the customer is not having any investment:-

In this Case Client can directly change his/her bank account by directly contacting the Customer Support team.

Deletion of Bank account:-

The Default bank account can't be deleted directly. Client has to first change the default bank account and then he can proceed with the deletion process in the app. But, In case of a secondary bank account. The client can directly delete it from the App.

BSE StarMF Migration:-

Paytm money has started migrating its customers to its Broking Business. Instead of using their own platform for direct transactions, Paytm money will migrate to the BSE STAR exchange platform and the transactions will use Paytm's broking code instead of RIA Code.

Earlier, Mutual Funds in Paytm Money was based on RTA model (i.e., Orders were placed directly through AMCs. After July 2022, BSE migration orders will be placed to BSE and BSE will forward it to AMCs.

In order to get BSE migrated, customers need to create a Demat account and update the KYC.

Why KYC is Important now:-

Earlier, Paytm Money was offering Direct Mutual Fund execution and advisory services on its in-house technology platform under an RIA code, in accordance with SEBI regulations. Further to discontinuation of its advisory services in April 2021, Paytm Money has now decided to offer only execution services for Direct Mutual Funds using stock broking code from July 2022.

The technology backend shift from a RIA code to Stock Broker code on BSE StAR requires creation of a UCC (Unique Client Code) and the UCC regulations of SEBI require users to mandatorily have a demat account.

We would require a couple of details from you in addition to what you provided as part of your initial KYC on our platform and need to submit them to the exchanges to upgrade your account to continue being compliant.

For your convenience, this entire process has been simplified and is 100% digital on the Paytm Money app. It is absolutely FREE of any charges. We assure you that it will not take more than a few minutes to complete it.

Top 5 things to know about the BSE StAR migration

1. Paytm Money will continue to offer Direct Mutual Funds on its app. There will be no change in investor experience
2. Demat account opening is necessary as we have to mandatorily use our Broking Code to facilitate Direct Mutual Fund transactions on BSE StAR and is unavoidable in this setup
3. Direct Mutual Fund units will continue to be in SOA format post migration
4. Demat account is free for life as long it is used only for Direct Mutual Fund transactions
5. Direct Mutual Fund only investors need to
 - a. Submit a clear picture of their signature
 - b. Click a live photo on the Paytm Money app as a part of their KYC
 - c. Complete e-sign to open a Demat a/c as per regulations

The process is 100% digital.

Existing investors who are already investing in Equities through Paytm Money Demat account do not need to take any further action

Steps to Purchase from BSE star MF :-

Step 1:-Select the existing MF from your portfolio and click on invest more option.

Step 2:- Enter the amount you want to invest along with the SIP / Lump sum option.

Click on 'Proceed.' Now , Your request to purchase is submitted to BSE.

Step 3:-BSE StAR MF will send a link to your email address for 2-factor authentication as per RTA records.

Step 4:-After authentication, BSE StAR MF will send a payment link to your email id/phone number. You have to make the payment using that link.

Step 5:-BSE StAR MF will process your transaction.

2FA Authentication:-

As per the BSE notice dated 09 Jan 2023, 2-Factor Authentication shall be applicable for all types of SIP registration and lump sum purchase transactions with effect from April 1, 2023. So, to maintain regulatory compliance and ensure better security of their funds, all investors will be required to complete a 2-factor authentication for purchasing Mutual Fund units.

The 2-Factor Authentication will be done by sending OTP to the email address and phone number associated with the folios in RTA records. To ensure you do not face any hassle in receiving OTPs for the same, we suggest you to use the same email address and phone number across your folios. It'll make your investing experience more organized and easier.

You can update your phone number and email address across your folios through RTAs websites like CAMS and Karvy (KFintech). Find out which RTA your investments fall under by clicking [here](#).

- **CAMS:**

https://www.camsonline.com/Investors/Service-requests/Updation_Email_Id_or_Mobile_No/Update-email

- **Karvy (KFintech):**

<https://mfs.kfintech.com/investor/Transact/ChangeFolioEmail>

If you already use the same email address and phone number for all your folios, you do not need to update your details.

What is Switch ?

- Switch can be defined as the transfer of Mutual funds from one platform to another platform

Types of Switch:-

There are 2 types of switch:-

- 1)Switch In:- Transfer of funds from external platform to Paytm Money.
- 2)Switch Out:- Transfer of funds from Paytm Money to an external platform.

Switch In:-

- Transfer of funds from other platforms to Paytm Money.
- Switch-in process takes 4-5 business days to get successful.
- Exit load is applicable while switching which is charged by the AMC and not by Paytm Money.
- Exit load depends upon the fund scheme.
- Customers can check the exit load details under Scheme Information Documents in the Paytm Money app.

Switch Out:-

In order to switch out (transfer the funds from Paytm Money to another platform), customers need to contact the other intermediary platform where they want to transfer the funds.

What is New Fund Offer?

A New Fund Offer (NFO) is a process through which a mutual fund offers units of a new scheme to the public for the first time. During the NFO period, investors can purchase units of the scheme at the face value of the units, which is usually Rs. 10. The objective of an NFO is to raise money from investors to invest in specific asset classes or sectors. NFOs are a way for mutual funds to launch new products and expand their offerings.

How Does New Fund Offer work?

In a new fund offer, the opportunity to subscribe to the scheme is available only over a limited period. The investors may purchase units of the mutual fund scheme during the pre-defined period and subscribe to the NFO at an offer price. This is usually fixed at Rs 10. Once the tenure expires, the investors would be able to purchase the fund units at the specified price

How You Can participate in NFO in Paytm Money:-

You can Check NFO details in Paytm Money App in Home Screen. You can participate in an NFO by investing through Paytm Money. The subscription period for an NFO is usually open for a few weeks:-

What is the minimum investment amount for an NFO?

The minimum investment amount for an NFO varies from fund to fund and can range from as low as Rs. 100 to as high as Rs. 5,000. Some funds may also have a minimum investment amount for subsequent purchases. It is important to check the minimum investment amount before investing in an NFO.

What is the lock-in period for NFO units?

The lock-in period for NFO units varies depending on the type of mutual fund and the fund house's terms and conditions. Closed-end NFOs typically have a fixed lock-in period of three years or more, during which investors cannot redeem their units. On the other hand, open-end NFOs do not have a lock-in period, and investors can buy and sell units on an ongoing basis. It is essential to check the terms and conditions of the NFO before investing to understand the lock-in period and other restrictions that may apply.

What is the lock-in period for NFO units?

The lock-in period for NFO units varies depending on the type of mutual fund and the fund house's terms and conditions. Closed-end NFOs typically have a fixed lock-in period of three years or more, during which investors cannot redeem their units. On the other hand, open-end NFOs do not have a lock-in period, and investors can buy and sell units on an ongoing basis. It is essential to check the terms and conditions of the NFO before investing to understand the lock-in period and other restrictions that may apply.

What points should I consider before investing in a NFO?

Before investing in a New Fund Offer (NFO), it is important to consider a few key points. Firstly, do not rely solely on the face value of the fund, as this does not necessarily guarantee good performance. Instead, consider whether the fund's unique investment theme aligns with your financial goals and risk appetite. Additionally, research the fund house's name and standing in the industry, as well as the track record of the fund manager. Furthermore, pay attention to the costs and expenses associated with the fund, and be aware of the structure of the scheme, whether it is open-ended or closed-ended. By considering these factors, you can make a more informed decision about whether investing in an NFO is right for you.
